

Dear Class of 2K11!

Images by Tracy Lovett is searching for Seniors who want original, beautiful portraits with an artistic touch! When we ask our current customers why they chose us to make their images, the first thing they say is "Your pictures just look different from everyone else's". And that is exactly what we strive for: images, products, and services that are customized to you--your look, your personality, your activities, and your price preferences.

A little about us--we have been shooting Senior Portraits for 9 years now, and we really enjoy this part of our business. We like meeting all the different Seniors that come in and we find each Session is a completely unique experience. We are very low key, with our Studio in our home. Chances are, you will see us in our comfy jeans when you show up. We make most of our backgrounds and we design our sets ourselves, so you get totally original images. Our kids are always around--we have 4--and we are very pet friendly--we have to be, as we have a couple kitties running around.

Studio work is important, but we really enjoy location shoots as well, and you will find several Sessions that include different places to make pictures. We work frequently at Waubonsie State Park, as well as Arbor Lodge in Nebraska City, but we can and do shoot everywhere. From the Old Market in Omaha, to Henry Doorley Zoo, to the backstreets of Shenandoah and the backroads of the surrounding countryside, we are open for anything. Call us, let us know where you want to shoot, and we will give you a quote.

Many times, customers want to know how much "stuff" to bring, how many wardrobe changes they get. We do not limit our subjects on either point. Bring what you want, what you like, what you love, and we will try to find a way to work it into your session. We will make this point though--your portraits are of you, not your wardrobe. Bring things that really represent you, who you are, and most of all, things that will help accentuate the look you are going for. When you are planning your wardrobe, think in terms of "looks". Make a list of the looks you want--urban, country, formal, sporty, shabby-chic, punk, goth, pajamas, whatever really appeals to you. Then pack accordingly, and don't forget accessories. We will do the rest. And if you have any questions give us a call or email--we would love to discuss your ideas.

So, if you are interested in photographs that look like no one else's, email! Call! Set up a meeting in a dark alley! We would love to collaborate with you to make original, amazing Senior Portraits!
